

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: City of Lodi - Police Training Facility

Lead Agency: City of Lodi

Contact Name: Paul Junker, Contract City Planner

Email: pjunker@lodi.gov

Phone Number: 209-333-6711

Project Location: Lodi  
*City*

San Joaquin  
*County*

Project Description (Proposed actions, location, and/or consequences).

The City of Lodi is proposing to provide the City of Lodi with a police training facility located at the White Slough Water Pollution Control Facility (WPCF). The purpose of this project is to provide the necessary long-term police training facility required in order to properly train and certify the Department of a long-term, consistent basis, as well as potentially offer some "open to the public" opportunities such as scheduled hunter safety courses or local shooting club competition space. The Training Facility proposes to include a classroom training facility, short-, medium-, and long-range shooting ranges, a defensive driving course, a detonation area and bunker, as well as a mobile restroom, storage containers, parking stalls, an emergency access lane, target berms, improvements to the existing gravel road, lighting, and site fencing. Other improvements include hardscape and landscaping.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Project does not have the potential to substantially reduce habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory. The project will participate in the San Joaquin County Multi-species Habitat Conservation Plan, this will involve payment of fees and implementation of standard Take Avoidance measures outlined in the Habitat Conservation Plan. The project will not directly impact the built environment cultural resources identified near the proposed project and no archaeological resources were identified within the Project Area. In the event that archaeological resources are observed during Project construction-related activities, Mitigation Measures CR-1, CR-2 and CR-3 are in place to reduce impacts to a less than significant level.

With mitigation measures incorporated, the project would not be expected to result in any new environmental effects, such as significant increases in GHG emissions, exposure to hazards or hazardous materials, or exposure to excessive noise levels, which would cause adverse effects on human beings. Because adverse effects on human beings, either directly or indirectly, would not occur as a result of implementation of the proposed project, less-than-significant impacts with mitigations incorporated would result.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not Applicable

Provide a list of the responsible or trustee agencies for the project.
